

St Joseph's Catholic Primary School

CRC Article 29 (goals of education)

Education must develop every child's personality, talents and abilities to the full. It must encourage the child's respect for human rights, as well as respect for their parents, their own and other cultures, and the environment.

Music Policy

1 Aims and objectives

1.1 Music is a unique way of communicating that can inspire and motivate children. It is a vehicle for personal expression and it can play an important part in the personal development of people. Music reflects the culture and society we live in, and so the teaching and learning of music enables children to better understand the world they live in. Besides being a creative and enjoyable activity, music can also be a highly academic and demanding subject. It also plays an important part in helping children feel part of a community. We provide opportunities for all children to create, play, perform and enjoy music, to develop the skills to appreciate a wide variety of musical forms, and to begin to make judgements about the quality of music.

1.2 The aims of music teaching are to enable children to:

- know and understand how sounds are made and then organised into musical structures;
- know how music is made through a variety of instruments;
- know how music is composed and written down;
- know how music is influenced by the time, place and purpose for which it was written;
- develop the interrelated skills of performing, composing and appreciating music.

2 Teaching and learning style

2.1 At St Joseph's Catholic Primary School we make music an enjoyable learning experience. We encourage children to participate in a variety of musical experiences through which we aim to build up the confidence of all children. Singing lies at the heart of good music teaching. Our teaching focuses on developing the children's ability to sing in tune and with other people. Through singing songs, children learn about the structure and organisation of music. We teach them to listen and to appreciate different forms of music. As children get older, we expect them to maintain their concentration for longer and to listen to more extended pieces of music. Children develop descriptive skills in music lessons when learning about how music can represent feelings and emotions. We teach them the disciplined skills of recognising pulse and pitch. We often teach these together. We also teach children how to work with others to make music and how individuals combine together to make sounds. We also teach them musical notation and how to compose music.

- 2.2 We recognise that there are children of widely different musical abilities in all classes, so we provide suitable learning opportunities for all children by matching the challenge of the task to the ability of the child. We achieve this in a variety of ways by:
- setting common tasks which are open-ended and can have a variety of responses;
 - setting tasks of increasing difficulty (not all children complete all tasks);
 - grouping children by ability in the room and setting different tasks to each ability group;
 - providing resources of different complexity depending on the ability of the child;
 - using classroom assistants to support the work of individuals or groups of children

3 **Additional music teaching**

- 3.1 Reception and Key Stage One children have Music provision all year from **Dudley Performing Arts** where they engage in rhythm and singing activities, learn new music vocabulary and also learn how to play notes on the recorder. They have this music provision for 30 minutes per week all year.

Key Stage Two children are offered the opportunity to study a musical instrument such as African drums/guitar with teachers from Dudley Performing Arts for one hour per week half of the year. The school has chosen to participate in the programme.

Children also get the opportunity to play a percussion instrument in whole school Mass, learning how to play to the beat and contribute to the special gathering performing for their friends and members of the parish.

The Music Co-ordinator has a choir with 40+ children from Years 1-6 who perform at local events and competitions throughout the year, as well as entertaining in whole school assemblies and for parents to watch. All children at St Joseph's are also invited to attend School Parish Mass in Church to join in with the hymns or play a musical instrument.

4 **Music curriculum planning**

- 4.1 Our school uses the National Curriculum as the basis for its curriculum planning. We also use a commercial scheme, Music Express. There are opportunities for children of all abilities to develop their skills and knowledge in each lesson.
- 4.2 Currently Music is taught to each class by Dudley Performing Arts. Children in Reception and KS1 learn Music for 30 minutes per week all year. Children in KS2 learn Music one hour per week for half a year. During the remainder of the year they will learn music in conjunction with other subjects. We teach the knowledge, skills and understanding set out in the National Curriculum.
- 4.3 The Music teacher from Dudley Performing Arts (DPA) writes the daily lesson plans, which list the specific learning objectives of each lesson. The Music teacher is responsible for keeping these individual plans and for annotating with relevant assessment notes.

St Joseph's Catholic Primary School's music planning is geared to three aspects of progress:

- increasing breadth and range of musical experiences;
- increasing challenge and difficulty in musical activities;
- increasing confidence, sensitivity and creativity in the children's music making.

5 Foundation Stage

- 5.1** We teach extra music in Nursery and Reception classes as an integral part of the topic work covered during the year. As these classes are part of the Foundation Stage of the National Curriculum, we relate the musical aspects of the children's work to the objectives set out in the Early Learning Goals (ELGs) which underpin the curriculum planning for children aged three to five. Music contributes to a child's personal and social development. Counting songs foster a child's mathematical ability and songs from different cultures increase a child's knowledge and understanding of the world.

6 The contribution of music to teaching in other curriculum areas

6.1 English

Music contributes significantly to the teaching of English in our school by actively promoting the skills of reading, writing, speaking and listening. Children develop their language skills through singing songs, with attention to diction, meaning, rhythm and rhyme. They use reference books and develop research skills when finding out about the history of music and musicians. Music is also used to stimulate discussion or creative writing. Through working with others in a musical setting, children develop their ability to communicate ideas effectively.

6.2 Mathematics

Music contributes to the teaching of mathematics in that children who study the structure of music are observing patterns and processes. Talent in music is often linked with talent in mathematics, as the rhythm and structure of music is mathematically based.

6.3 Information and communication technology (ICT)

ICT is used in music where appropriate. Children use computer programmes to compose music. They also use ICT in music to enhance their research skills through the Internet and CD ROMs. They listen to music on the Internet and they also record their own compositions to send to other schools electronically. Children improve the presentation of their work through the use of ICT.

6.4 Personal, social and health education (PSHE) and citizenship

Music contributes significantly to the teaching of personal, social, citizenship and health education. Through the common goal of making music, children learn to work effectively with other people and build up good relationships. Music is the basis of many social activities and has an important role to play in the personal development of many young people. It has a vital role to play in building self-confidence. Participation in successful public musical performances is sometimes one of the most memorable things young people do at school.

6.5 Spiritual, moral, social and cultural development

Listening, creating or performing music can sometimes be a moving and even spiritual experience. We encourage children to reflect on the important effect that music has on people's moods, senses and quality of life. Children at St Joseph's Catholic Primary School have the opportunity to encounter music from many cultures and, through their growing knowledge and understanding of the music, they develop more positive attitudes towards other cultures and societies.

7 Teaching music to children with special needs

7.1 We teach music to all children, whatever their ability, in accordance with the school curriculum policy of providing a broad and balanced education to all children. Teachers provide learning opportunities matched to the needs of children with learning difficulties, and our work in music takes into account the targets set for individual children in their Individual Education Plans (IEPs).

8 Assessment and recording

8.1 Teachers assess children's work in music by making informal judgements as they observe them during lessons. On completion of a piece of work, the teacher marks the work and comments as necessary. At the end of the year, the teacher makes a summary judgement about the work of each pupil in relation to the National Curriculum level of attainment and records these grades. We use this as the basis for assessing the progress of the child and we pass this information on to the next teacher at the end of the year.

8.2 The music subject leader keeps samples of children's work in a portfolio, which s/he uses to demonstrate the expected level of achievement in music for each age group in the school.

9 Resources

9.1 We keep resources for music in a central store on the music trolley, available in the hall for all classes to use. The library contains a good supply of topic books and available computer software is designed to support children's individual research. Music Express books which have been purchased by school can also facilitate children's learning.

10 Monitoring and review

10.1 The music subject leader is responsible for the standard of children's work and for the quality of teaching in music. The work of the subject leader also involves supporting colleagues in the teaching of music, being informed about current developments in the subject and providing a strategic lead and direction for the subject in the school. The music subject leader is responsible for giving the head teacher an annual summary report in which s/he evaluates the strengths and weaknesses in the subject and indicates areas for further improvement. The music subject leader has specially-allocated time for carrying out the vital task of reviewing samples of children's work. The Music Co-ordinator will conduct learning walks throughout the year to overlook Music teaching throughout the school and will perform model lessons for other teachers to take ideas from.
